News Release

NEW - EASY TO READ DISPLAY

Lake Bluff, IL – Liquid Controls LLC, an industry leader in flow measurement and process control instrumentation for over 45 years, is pleased to introduce a new, 1" LCD display on all LectroCount™ series electronic registers. The new 1" LCD is the same type of large, easy to read display used on many retail gasoline dispensers. The display area is twice the size of the previous model, and can easily be viewed from distances of up to 50 ft. A built in backlight assists low light or nighttime viewing. The NEMA 4X register is rated for temperatures of –40°F to 158°F, and designed to meet Class I, Division 1 or Class I Division 2 environments (Groups C and D). LectroCount™ registers are available for a variety of meter types and applications, including Weights & Measures. For more information on this product as well as our full line of positive displacement, mass flow, electromagnetic, and turbine meters contact Liquid Controls at 1-800-458-5262 or visit our website at www.lcmeter.com.
