

Liquid Controls, LLC Introduces Meter with 1000-GPM Capability

Lake Bluff, IL, Liquid Controls, an industry leader in precision flow measurement for the aviation industry for over 45 years, announces a 1000-gpm rating for its popular M-80 flow meter for jet aircraft refueling applications. This high flow capability in a compactly sized 6" meter is in great demand to minimize gate time for fueling the larger aircraft including 747's, 767's, 777's, A340's, and others in today's fast-turn-around airport environment.

Contact Liquid Controls for more information on the complete line of PD meters for refuelers, hydrant carts, and fixed-site fueling cabinets. **Liquid Controls, 105 Albrecht Drive, Lake Bluff, IL: Telephone: 1-800-458-5262, Website: www.lcmeter.com.**
